

## COVID-19 Status Update for July 20, 2020

Over the last number of weeks, we have been conducting surveillance and response testing for COVID-19 in our skilled nursing staff and residents. Additionally, any staff who may have had occasion to enter those areas as part of their work, and others who have had suspected or known exposures, are tested as well. Unfortunately, in the last several days, we have received positive results for two skilled nursing residents and a total of four staff in our nursing and housekeeping departments. All of these individuals have been, and continue to be, asymptomatic. The employees are safely quarantined at home until cleared to return to work by the Department of Public Health. The residents are being cared for in our dedicated COVID-19 area, by nursing staff specifically assigned to only this area.

We continue to diligently engage in multiple precautions and infection control practices to protect the health and safety of our 500 residents and 350 employees throughout the campus. This is our highest priority. The current escalating rate of new COVID-19 cases in our area of Los Angeles County presents us with additional challenge in this effort.

We remain so grateful for the patience of our **residents** in the face of significant change to their daily lives, the tireless efforts of our **employees** as they work to not only combat the virus, but create a happy environment, and our **Board of Directors**, ever ready to provide support and encouragement.
